

## How To Check NYS Pesticide Product Registration Status

**New York State Pesticide Product Ingredient and Manufacturer System (PIMS)**  
In conjunction with Cornell University, the Department of Environmental Conservation provides access through the internet to its Pesticide Product databases.

The **PIMS** databases are designed to aid the user in searching for pesticide product information. This information is supplied to the Cornell University Pesticide Management Education Program (PMEP) by the Pesticide Product Registration Section of the New York State Department of Environmental Conservation (NYSDEC).

**Visit the PIMS website at: <http://pmep.cce.cornell.edu/pims/>**

When you visit PIMS you can search and view information about pesticide products that are currently registered and no longer registered in New York State. You can search for pesticide information using product names, EPA registration numbers, active ingredients and many other categories. Online instructions are available to assist your search of the databases.

NYSDEC and Cornell update the PIMS databases weekly.

**Visit the NYSDEC Website at: [www.dec.ny.gov](http://www.dec.ny.gov)**

**If you discover errors, have problems or questions please contact the Pesticide Product Registration Section at (518) 402-8768 or  
by email at [ppr@gw.dec.state.ny.us](mailto:ppr@gw.dec.state.ny.us)**
